WORK EXPERIENCE

Middle Frontend developer

Chibbis

📅 June 2025 – current 📍 Russia, Moscow

- Modernized the internal product management panel: migrated a legacy jQuery admin tool to React/TypeScript, dramatically accelerating catalog operations for the merchandising team.
- Helped to develop the loyalty program core: built the customer dashboard featuring purchase history, point earning/redemption, and personalized promo coupons.
- Boosted checkout conversion by 8%: our team redesigned the cart-to-order flow with instant field validation, address autocomplete, and smart delivery slot selection.

Middle Frontend developer

Coordinate system LLC

📅 May 2024 – May 2025 📍 Russia, Moscow

- Founded and scaled the Startup Cycle project to pre-seed stage: secured acceptance into Skolkovo Foundation pre-accelerator (top 5% of startups).
- Designed and built web service architecture from scratch: independently selected the technology stack including Next.js and set up the entire development infrastructure.
- Optimized frontend performance: reduced page load time by 36% and improved interface responsiveness by refactoring the critical rendering path.
- Ensured codebase stability: introduced unit testing practices using Jest and React Testing Library, increasing test coverage to 43%.
- Proposed and implemented 6 UX/UI improvements that directly increased user engagement metrics by 18%.

Junior Frontend developer

AHISS

📅 April 2023 – May 2024 📍 Russia, Moscow

- Delivered the official website for Russia’s largest cybersecurity event (CTF Cup): built and launched a high-load platform serving the nation’s most popular CTF competition.
- Built and launched an e-commerce store from scratch: developed a retail platform and payment infrastructure to monetize the CTF community and event merchandise.
- Modernized the tech stack without service disruption: seamlessly migrated a critical project from Vue to React, improving long-term maintainability and performance.
- Managed project timelines and quality by accurately estimating tasks and defining realistic timelines using a time tracker, while improving the performance of legacy codebases through targeted optimizations.
- Collaborated with cybersecurity specialists to translate strict domain constraints into practical UX/UI solutions, enhancing cross-team communication and improving design outcomes.

CAREER OBJECTIVE

Frontend Developer with a track record of developing high-traffic products in retail (Chibbis), cybersecurity (CTF Cup), and startups. Focused on building performant, scalable interfaces from scratch. Eager to apply cross-domain technical expertise to solve complex UI challenges and drive user efficiency within a larger engineering team.

EDUCATION

Bachelor of Programming
Development of web and multimedia applications

College of Computer Science and Programming of the Financial University

📅 September 2021 – June 2025
📍 Russia, Moscow

SKILLS

Languages

- TypeScript
- JavaScript
- HTML

Frameworks

- Next.js
- React
- Vite

Libraries

- Motion
- Map Libre GL
- Swiper
- Axios
- Formik
- Yup
- Next Intl
- Next Themes
- React Toastify

Testing

- Jest
- React Testing library

Styling

- CSS
- Scss
- Tailwind CSS
